

# SMACNA IAQ

## Cheat Sheet

### HVAC Protection

Ductwork is covered and sealed prior to installation.

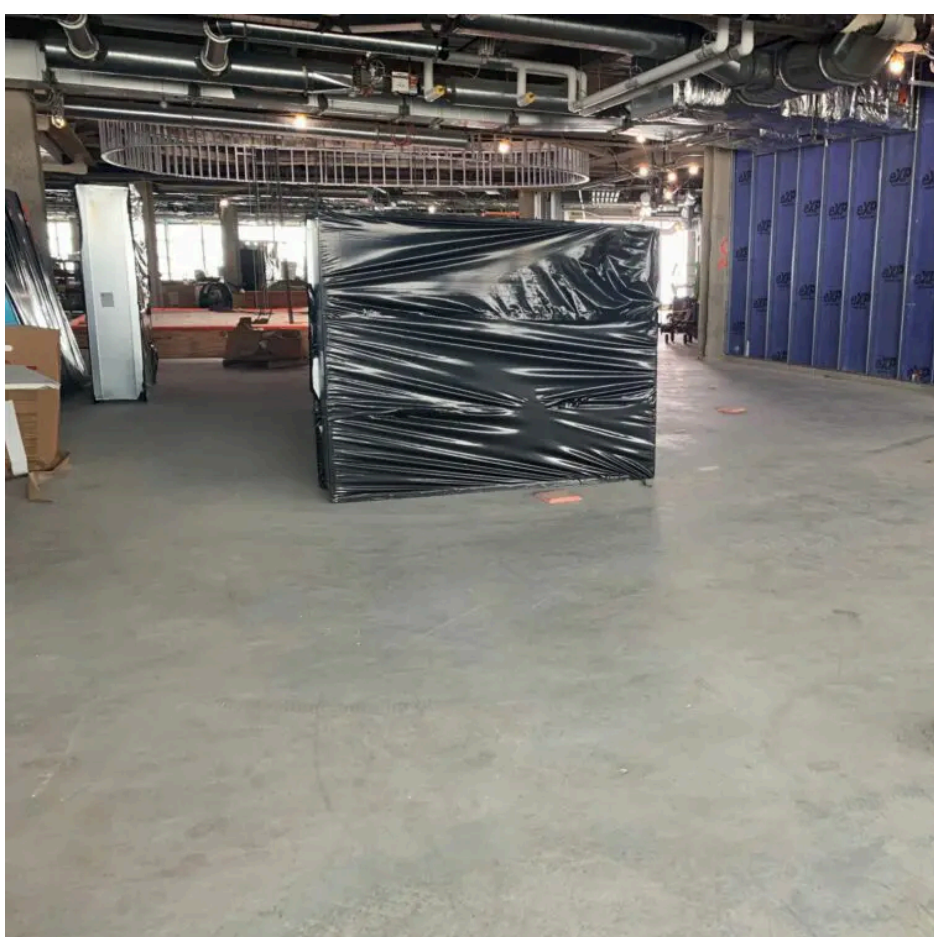

### Source Control

Contained space for High Purity Pip, eliminated outside variables.

### Pathway Interruption

Blue sticky mats at every entrance and ram board pathways to every room to minimize tracking pollutants.

### Housekeeping

Floors swept and free of debris.

### Scheduling

Project is split up in Phases to ensure trades are not working on top of each other, and to minimize exposure of emitting materials; finishes to other trades.

### Absorptive Materials

Wooden doors stored inside a warehouse wrapped in plastic until install.
